

## 4 Things to Keep You Cyber Safe

### Turn on Multifactor Authentication

Implement [multifactor authentication](#) on your accounts and make it significantly less likely you'll get hacked.

### Update Your Software

Update your software. In fact, turn on automatic updates.

### Think Before You Click

Think before you click. More than 90% of successful cyber-attacks start with a phishing email.

### Use Strong Passwords

Use strong passwords, and ideally a password manager to generate and store unique passwords.
